reach 70 % share by
2050

On agenda in 2022

- More resources for administrative courts to speed up the handling times

On agenda in 2022

- More resources for administrative courts to speed up the handling times
- Overlapping possibilities to appeal on the court are removed

On agenda in 2022

- More resources for administrative courts to speed up the handling times
- Overlapping possibilities to appeal on the court are removed
- Feasibility of offshore wind power is improved

On agenda in 2022

- More resources for administrative courts to speed up the handling times
- Overlapping possibilities to appeal on the court are removed
- Feasibility of offshore wind power is improved
- Resources for handling the grid expropriation permits are increased

On agenda in 2022

- More resources for administrative courts to speed up the handling times
- Overlapping possibilities to appeal on the court are removed
- Feasibility of offshore wind power is improved
- Resources for handling the grid expropriation permits are increased
- Real impacts on birds of prey are studied. The impacts on EIA should not be exaggerated

On agenda in 2022

- More resources for administrative courts to speed up the handling times
- Overlapping possibilities to appeal on the court are removed
- Feasibility of offshore wind power is improved
- Resources for handling the grid expropriation permits are increased
- Real impacts on birds of prey are studied. The impacts on EIA should not be exaggerated
- It is important that municipalities can fully keep the property tax also in future

All need to secure public acceptance for their part

- Fair and equal treating of landowners

All need to secure public acceptance for their part

- Fair and equal treating of landowners
- Make sure land-lease agreements are easy to understand and do not include unconscionable terms

All need to secure public acceptance for their part

- Fair and equal treating of landowners
- Make sure land-lease agreements are easy to understand and do not include unconscionable terms
- Make sure the project development process is clear for shareholders – don't promise turbines to be constructed on someone's land prior to spatial planning etc.

All need to secure public acceptance for their part

- Fair and equal treating of landowners
- Make sure land-lease agreements are easy to understand and do not include unconscionable terms
- Make sure the project development process is clear for shareholders – don't promise turbines to be constructed on someone's land prior to spatial planning etc.
- Pay your fair share of property taxes

All need to secure public acceptance for their part

- Fair and equal treating of landowners
- Make sure land-lease agreements are easy to understand and do not include unconscionable terms
- Make sure the project development process is clear for shareholders – don't promise turbines to be constructed on someone's land prior to spatial planning etc.
- Pay your fair share of property taxes
- A growing number of operating wind farms and projects in pipeline - treat also neighbouring wind farms in fair way

All need to secure public acceptance for their part

- Fair and equal treating of landowners
- Make sure land-lease agreements are easy to understand and do not include unconscionable terms
- Make sure the project development process is clear for shareholders – don't promise turbines to be constructed on someone's land prior to spatial planning etc.
- Pay your fair share of property taxes
- A growing number of operating wind farms and projects in pipeline - treat also neighbouring wind farms in fair way
- Everybody benefits from high public acceptance and good spirit within the industry!

Coming up in 2022

- Wind Finland goes Construction on January 27th, Oulu/online
- Market Entrance training
- Tuulivoimakurssi 2, 25.-26.1. & 31.8.-1.9.
- Tuulivoimakurssi 1, 12.5. & 9.11.
- New courses will be available!
- Events & discussions (in Finnish)
 - Co-existence of radars and wind power, 15.3., Helsinki
 - Forest fires & wind farms, 21.4., Oulu
 - Reindeer herding & wind power, early June, Rovaniemi
